Experienced: PHP, Node.js, OOP, API's, AJAX, Firebase**,** AWS, Postman

---

APPLICATIONS DEVELOPED

Batsu!   Live | GitHub
- An accountability application that helps people keep others accountable for events
- Utilized **React.js** and **Redux** to create components that worked in unison with PHP and MySQL to create the functionality and logic of the application. Utilized **CSS3** to apply styling and animations

Othello   Live | GitHub
- A Star Wars Jedi vs. Sith themed Othello (reversi) application
- Utilized **HTML5** for the basic skeleton of the application, **CSS3** to apply the styling and animations, and **JavaScript**, **jQuery**, and OOP to create the logic and functionality

Memory Match   Live | GitHub
- A Star Wars themed memory match application that tracks accuracy, guesses, and statistics
- Utilized **HTML5** to create the basic skeleton, **CSS3** to apply styling and animations, and **JavaScript**, **jQuery**, and DOM creation/manipulation to create the logic, functionality, and statistics

Daily Report   Live | GitHub
- An application designed to locate a destination, give the weather, as well as the average traffic rate
- Utilized **HTML5** to create the basic skeleton, **CSS3** to apply styling and animations, and **JavaScript**, **jQuery**, and DOM creation/manipulation to create the logic, functionality, and statistics. Utilized Google Maps and Weather Underground **API** integration using **AJAX** calls.

PERSONAL INTERESTS

I am an avid soccer fan who has played in the past, and follow a variety of teams. I have a strong interest in motorsports and enjoy driving. I have a strong interest in technology and strive to know the ins-and-outs of current trends and recent updates. With that said, I am also an avid gamer who plays games such as Destiny, Final Fantasy, and a variety of others. During my free time, I enjoy traveling, camping, and backpacking throughout the country.
